STRATEGIC RECOMMENDATIONS FOR NEXT HALF YEAR

Agenda

2026

/3 TASK 1 KEY FINDINGS:

/3 TASK 2 KEY FINDINGS:

/4 CATEGORY OVERVIEW

/5 TRIAL STORE PERFORMANCE

TASK 1
KEY FINDINGS:

"Older Families - Budget" are the highest revenue drivers ($168K+).

"Young Singles/Couples - Mainstream" represent the highest margin opportunity, paying the most per unit ($4.08).

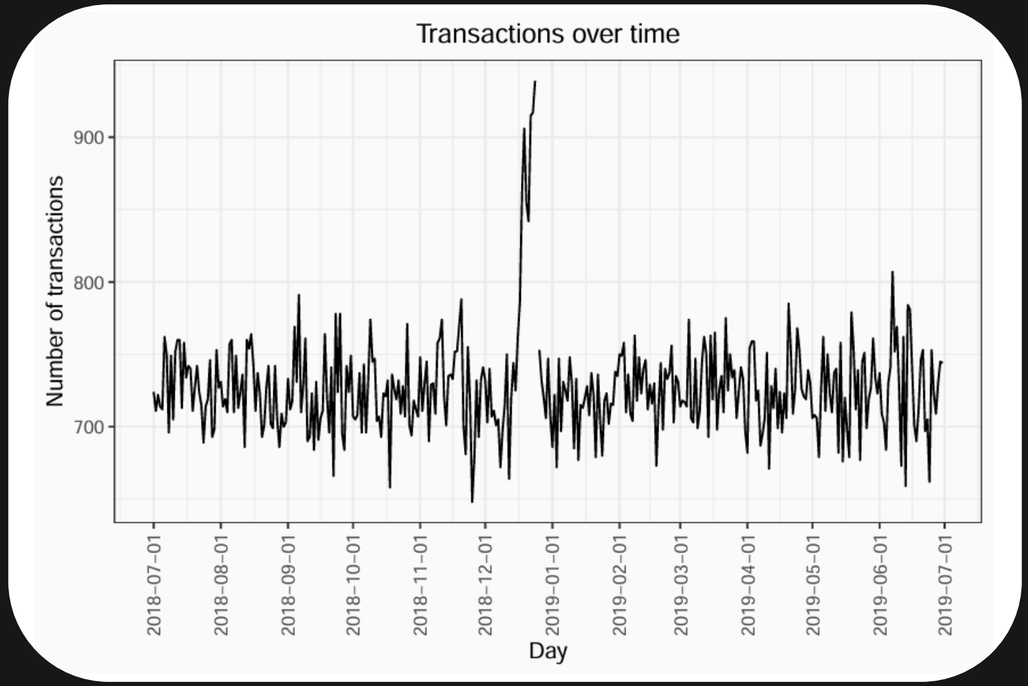
TASK 2
KEY FINDINGS:

The new store layout trial was highly successful, driving statistically significant sales uplifts.

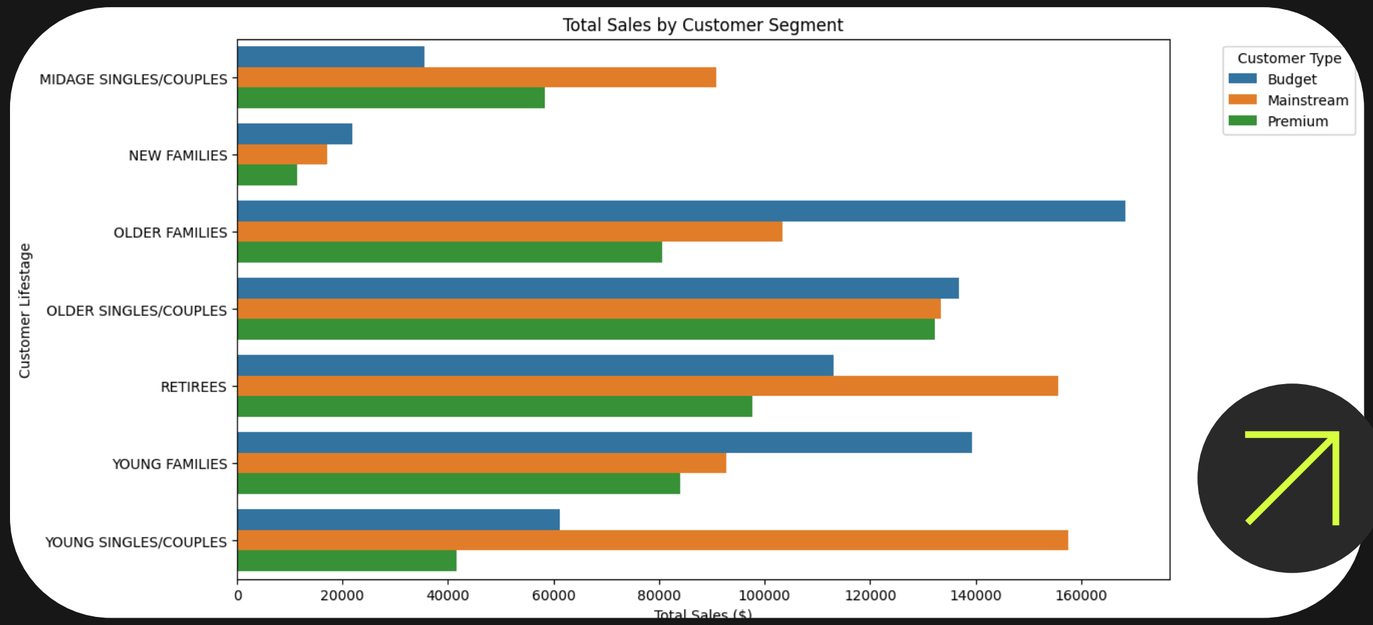
Store 77 saw a massive +62% sales increase in April compared to its control store.

CATEGORY OVERVIEW

Sales Dip: Sales experience a sharp drop in late December due to stores being closed for Christmas, followed by a steady normalization.



Affluence & Lifestage: Older Families consistently drive the highest volume. However, Mainstream Young Singles & Couples are highly engaged, showing strong impulse-buying behavior and a willingness to pay premium prices for brands like Tyrrells.



TRIAL STORE PERFORMANCE

The Methodology: Trial stores (77, 86, 88) were paired with Control stores based on historical sales and customer correlation to accurately measure the new layout's impact.

Performance Callout: The trial was a definitive success. As seen in the chart, Trial Store 77 significantly outperformed its control counterpart during the trial period (gray area), peaking at a 62% sales uplift. We highly recommend a national rollout of this new layout.
